Acoustic Grand Piano

## **SUPERB ACTION & PRECISION HAMMERS**

The most complicated part of any piano is the action, and ours is no exception. Composed of thousands of parts, all must be of the highest quality and precision to insure long life and smooth play. Our action uses seasoned hardwoods and state of the art carbon composites for durability and dynamic control. All bushings and dampers are the highest quality felt. Our precision hammers are crafted from seasoned hardwoods and the hammer heads and shanks are covered in the finest wool felt. Suzuki takes no shortcuts in the quality of our piano components. For the ultimate in expression and responsiveness, our grand touch is in your hands.

## **THE FINEST STRINGS**

There are over two hundred strings in a grand piano and each one must perform flawlessly every time, without exception. Suzuki uses only the finest high grade polished

German steel with hand wound solid copper windings.

# Features at a Glance

These German Roslau strings are without equal in piano manufacturing. Stretched over a wet sand cast plate, they produce incredible sound and resonance usually associated with pianos costing twice the price.

## **HARDROCK MAPLE PINBLOCKS**

The strings exert tremendous pressure when stretched around the pinblock. This part of the grand is meticulously designed to reduce maintenance and hold the piano in tune over time. Suzuki uses Hardrock Maple 18 ply pinblocks. This allows for a lifetime of musical enjoyment and dependability.

## **SELECT SPRUCE SOUNDBOARD**

Essential for sound quality, the soundboard is the heart of any acoustic grand piano. Suzuki ensures that our soundboards are the best of the best in a rigorous selection process. For starters, only AAA Canadian White Solid Spruce will do. Next, bridges are made from select hardwoods and kiln dried to proper humidity. Finally, the full length ribs are painstakingly notched into the rim liner of the piano to ensure

that the all important crown of the soundboard remains for the lifetime of the piano. These steps afford a quality of sound that resonates with a full rich bass, warm middle register and a clear, crisp treble. Played together, the entire range produces exceptional concert hall sound.

## **EXQUISITE CABINETRY**

All the varied components of Suzuki Acoustic Grand Pianos come together in a beautiful, hand bent rim and exquisite hand rubbed finish that adds warmth, elegance and character to your home. Meticulously assembled, each piano cabinet goes through a series of controls to assure the finest furniture quality finish possible.
